Shipboard Habitability Improvement Program

Monarch Supply Co., Inc. has been a key vendor on the Shipboard Habitability Contract for the US Navy for over 12 years. The Habitability Program was initially established by NAVSEA in 1975 and was later expanded to include all Type Commanders in 1979 when CNO issued OPNAVINST 9640.1.

The objective of this program is to completely renovate crew, CPO and troop berthing and sanitary spaces in order to attain and maintain the habitability standards set forth in OPNAVINST 9640.1.

Monarch Supply Co., Inc. stocks sinks, p-traps, plumbing fittings, chrome plated pipe, deck drains, sil-brazed fittings, ball valves, and union end valves for this long term contract.
